

Farm processing equipment

500-1000 kg/h mash

General

Specialized for small feed producers, Ottevanger Milling Engineers developed small farm processing solutions. The equipment is suitable for the production of feed up to 500 kg/h or 1000 kg/h. The installation includes all essential process machinery from the intake, grinding and mixing into a manual bagging system.

All the electrical components are pre-wired into a local control panel. The main components of the installation are installed and tested at our factory in the Netherlands and require a minimal installation time on site. All components are according to European Standards.

Technical specifications 500 kg/h

Intake system	1 m ³ /h bag intake hopper
Grinding system	450 - 150 hammer mill
Mixing system	250 kg - 500 l ribbon mixer
Manual bagging system	500 kg per hour with 25/50 kg bags
Electric control system	push button - manual
Erection time	± 2 days

Technical specifications 1000 kg/h

Intake system	2 m ³ /h bag intake hopper
Grinding system	450 - 150 hammer mill
Mixing system	500 kg - 1000 l ribbon mixer including upper hopper mixer
Manual bagging system	1000 kg per hour with 25/50 kg bags
Electric control system	push button - manual
Erection time	± 3 days
