

Ribbon mixer

General

Horizontal ribbon mixers are high efficient batch mixers that can mix with accuracy in a very short period. The mixer consists a "tulip"-shaped housing and a shaft with mixing spirals. Two ribbons move the materials in opposite direction. The geometric design guarantees an intensive mixing process with a low rotation speed. This results in an accuracy of 1:100.000 in a mixing time cap of 180 to 240 seconds.

Special attention has been paid to hygiene. Connections inside the machine are smooth to prevent pollution and cross contamination. The construction of the shaft consists an absolute minimum welding in order to avoid clamps with external bolts for hygienic reasons.

Features

- » Inspection hatch provided with safety locks
- » Pneumatic outlet side for dosed output
- » Mixing time between 180 - 240 seconds
- » Average 10 batches per hour (with outlet side)
- » Low energy consumption

Options

- » Stainless steel execution
- » Special internal coatings
- » Atex 22 components
- » Pneumatic bomb doors

Type	Contents (l)	Contents (kG)	Drive (kW)	Dimensions (mm)			Weight (kG) *
				A	B	C	
RM 500	500	250	3	1822	1000	1300	650
RM 1000	1000	500	5,5 - 9,2	2780	1210	1600	1700
