# Extrusion systems

Guarantees years of trouble-free and economical production.

Extrusion in the manufacturing of animal feed is a thermal process where starchy and protein based ingredients will be kneaded and cooked under specific moisture conditions.

## Why extrude?

- To minimise the effect of any anti nutritional factors.
- To fulfill specific process requirements (ANF).
- To maximise nutritional value of feed.

Ottevanger offers a range of extruders which are used for a wide range of innovative single screw extrusion solutions for different applications.

## Ottevanger extruders are used for:

- Pet Food extrusion.
- (Floating) aquafeed extrusion.
- Animal feed extrusion.
- Oil seed extraction.
- Cereal processing extrusion.
- Compacting.
- Pre-conditioning prior to other processes.
- And various customized applications.

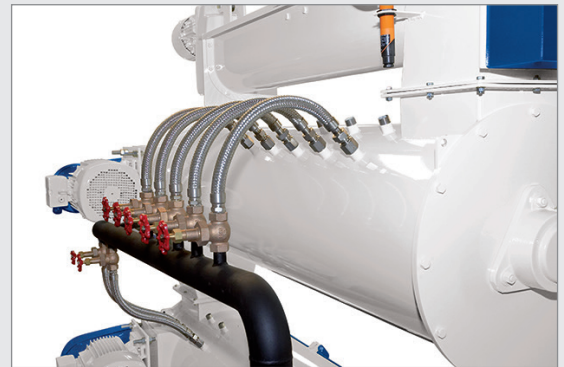

The robust and simple design of the Ottevanger Extruder guarantees years of trouble free and economical production.

Developed with Almex expertise in extrusion and expanding.

Type	Main motor (kW)	Drive cutter (kW)	Barrel diameter (mm)	Capacity (t/h)
AL 150	75	2,2	150	0,5-1,2
AL 200	90-132	3,0	200	1,5-3,0
AL 300	160-315	7,5-11,0	300	2,5-7,0

## Features

- ✓ Rigid construction / continuous operation
- ✓ Minimum space requirements
- ✓ V-belt or direct drive
- ✓ High quality product
- ✓ Low cost of wear parts
- ✓ Easy cleaning
- ✓ Easy to control
- ✓ Less downtime for maintenance

Steam injection system
